

The Test Results are Listed As Below:

**1. Technical Bulletin 117 -2013 Section I (Cover fabric)**

| Specimen No. | Smoldering time<br>(>45min or Not) | Char Length / in | Requirement                                                           | Rating |
|--------------|------------------------------------|------------------|-----------------------------------------------------------------------|--------|
| 1            | Not                                | 0                | Maximum char length<br>of any specimen shall<br>not exceed 1.8 inches | PASS   |
| 2            | Not                                | 0                |                                                                       | PASS   |
| 3            | Not                                | 0                |                                                                       | PASS   |

Tested Item(s): White artificial leather

Remark:

1. If the specimen continues to smolder after the 45 minute test duration, the cover fabric fails the test.
2. If more than one initial specimen fails, the cover fabric fails the test.
3. If any one of the three initial specimens fails, repeat the test on additional three specimens. Record the additional test specimens result in new datasheet and provide the Final Overall Rating.
4. If all three additional specimens pass the test, the cover fabric passes the test. If any one of the additional three specimens fails, the cover fabric fails the test.
